 Masažne i kade za kupanje

Kopalna kad kot prostor intimne

S kopalno kadjo Kolpasan si v kopalnici ustvarimo naše svetišče za razvajanje in sprostitvev. Topla voda zmanjšuje stres, prebujata občutke, nas sprošča in vsesplošno vpliva na naše boljše počutje. V njej si ustvarimo naš osebni prostor v katerem se odmaknemo od zunanjega sveta, sprostimo in obnovimo naše notranje ravnovesje.

Bathtub as a space of intimacy

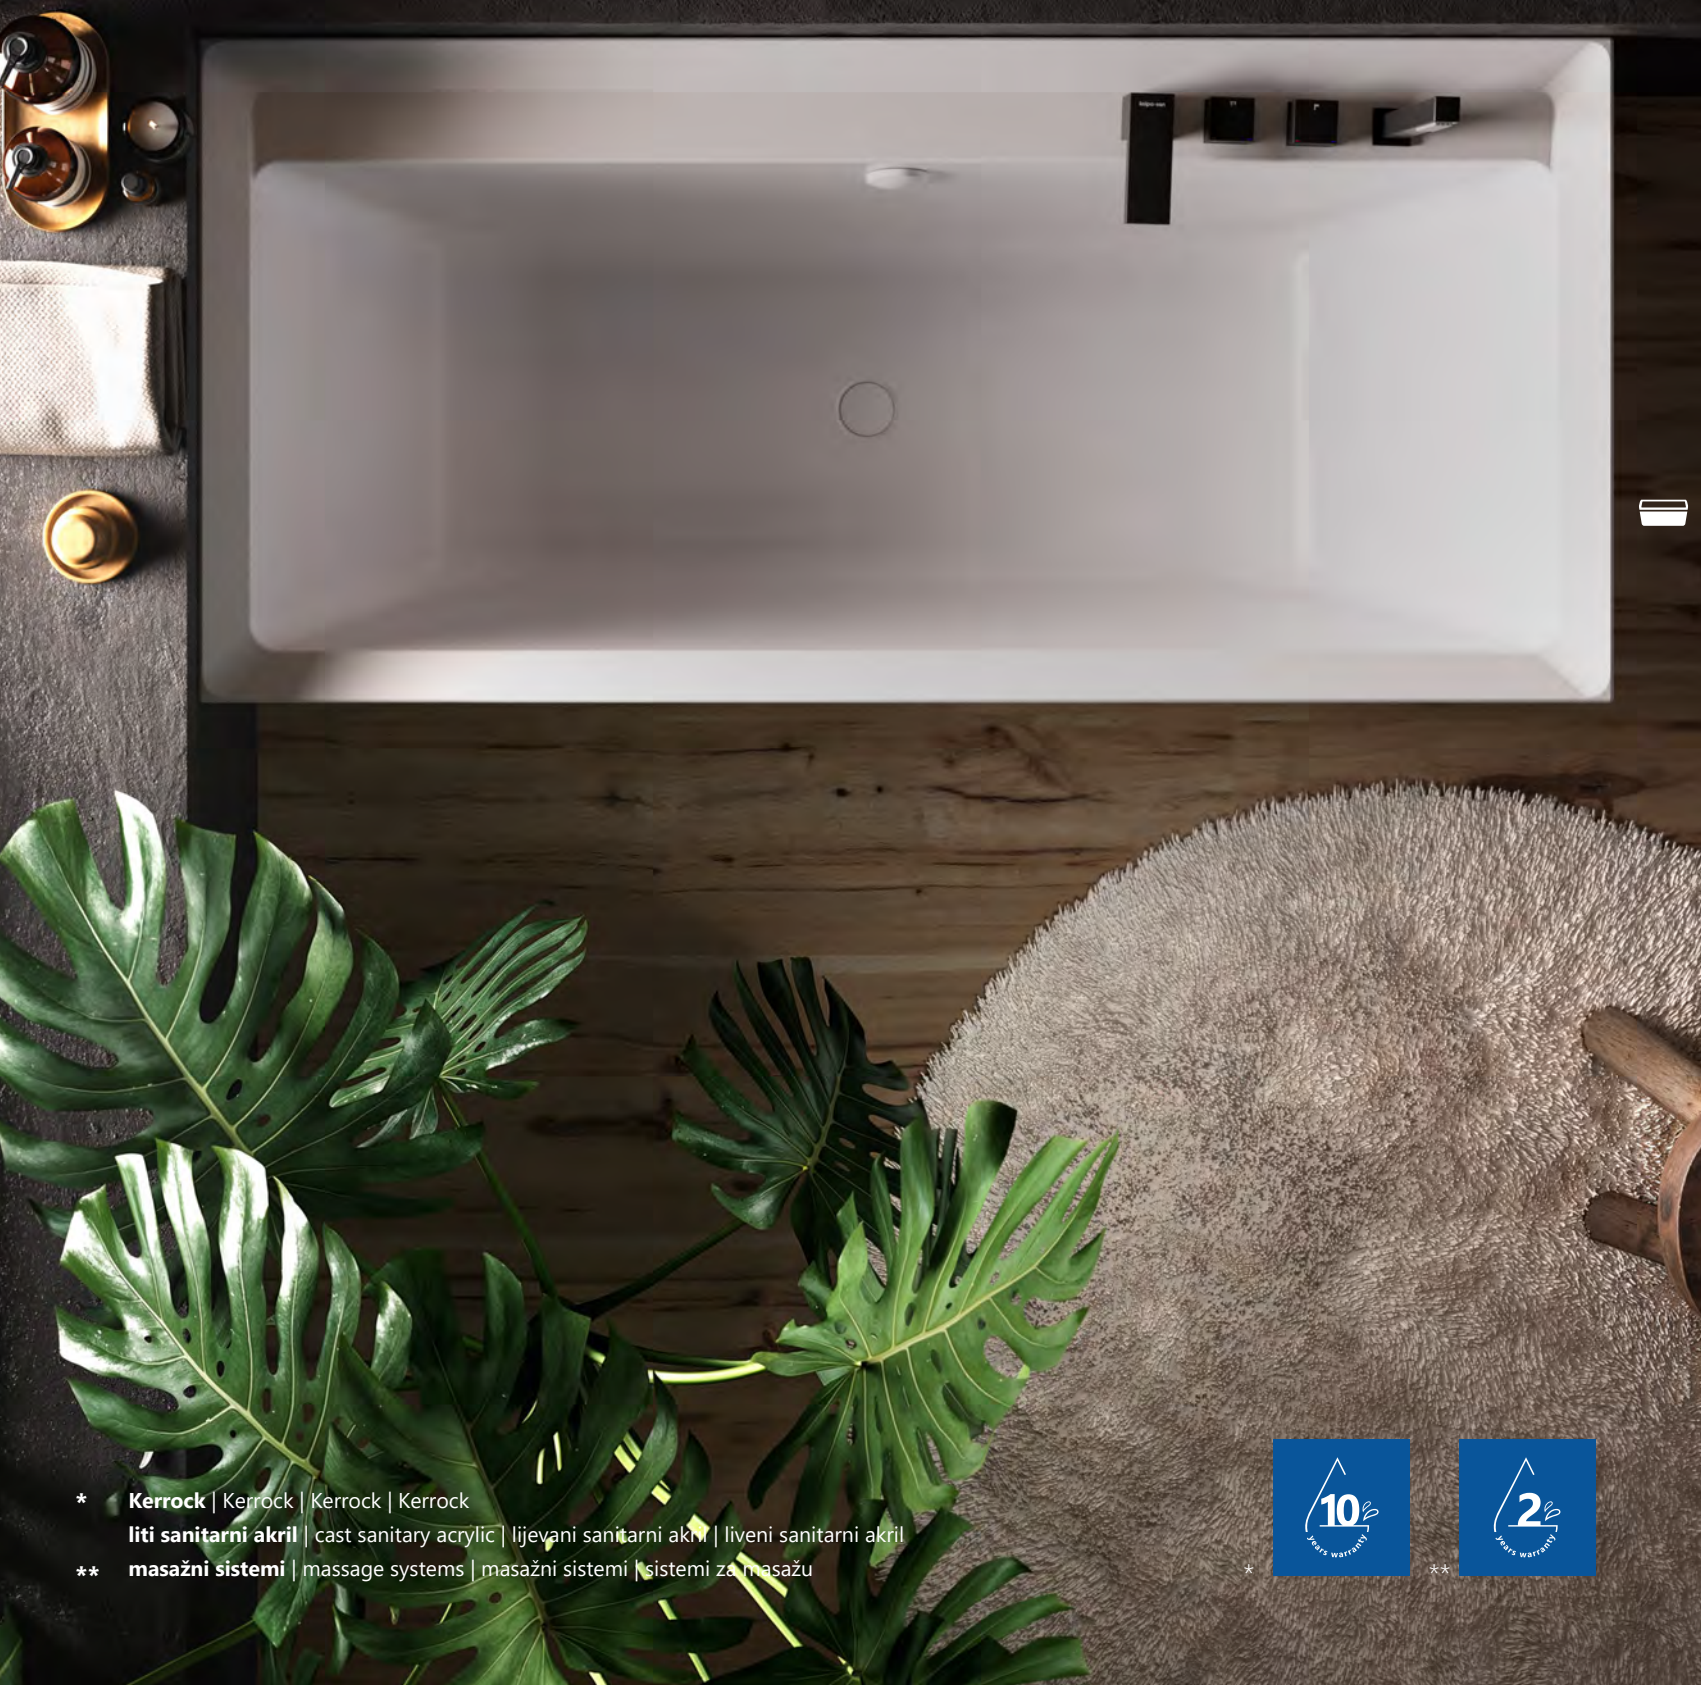

With the Kolpasan bathtub, you create your personal sanctuary of indulgence and relaxation. Warm water reduces stress, heightens senses, relaxes us and generally affects our well being. It becomes our personal space in which to escape from the outside world as well as unleash and restore our internal balance.

Kada kao prostor intimne

S kadom za kupanje Kolpasan stvaramo naš intiman prostor za ugađanje i opuštanje u kupaonici. Topla voda smanjuje stres, budi osjećaje, opušta nas i općenito djeluje tako da se bolje osjećamo. U njoj stvaramo naš osobni prostor u kojem se izdvajamo od vanjskog svijeta, opuštamo i obnavljamo našu unutarnju ravnotežu.

Kada kao prostor intimne

Sa Kolpasan kadom, stvaramo svoje utočište za udobnost i opuštanje u kupatilu. Topla voda smanjuje stres, pojačava čula, opušta nas i generalno utiče na naše blagostanje. U njoj stvaramo naš lični prostor gde se odvajamo od spoljašnjeg sveta, opuštamo i obnavljamo našu unutrašnju ravnotežu.

Bathtub trimming options

Mogućnost prirezivanja kupaonskih kada

Mogućnosti korigovanja kada za kupanje

Obrezovanje kopalne kadi ATYS 200x100 iz Kerrocka

Za primere, ko arhitekturne lastosti kopalnic, zlasti pri obnovah starejših objektov, ne dovoljujejo vgradnje klasičnih kadi iz rednega programa, nudimo našim strankam možnost prilagoditve določenih kopalnih kadi njenim specifičnim zahtevam. Za dodatne informacije glede modelov in možnosti, obiščite našo spletno stran www.kolpasan.si

Bathtub trimming ATYS 200x100 made from Kerrock

For situations where the architectural properties of bathrooms, especially in the renovation of older buildings, do not allow the installation of classic bathtubs from the regular program, we provide our customers with the possibility of adapting certain bathtubs to their specific requirements. For further information on the models and options, please visit our website www.kolpasan.eu

Prirezivanje kada za kupanje ATYS 200x100 od Kerrocka

U slučajevima kada arhitektonska svojstva kupaonica, posebno prilikom renoviranja starijih objekata, ne dopuštaju ugradnju klasičnih kada iz redovnog programa, našim kupcima pružamo mogućnost prilagođavanja određenih kada za kupanje njihovim specifičnim zahtjevima. Za dodatne informacije o modelima i mogućnostima posjetite našu internetsku stranicu www.kolpasan.hr

Prilagođavanje kade ATYS 200x100 od Kerrocka

U slučajevima kada arhitektonske karakteristike kupatila, posebno pri renoviranju starijih objekata, ne dozvoljavaju ugradnju klasičnih kada iz redovnog programa, našim klijentima nudimo mogućnost prilagođavanja određenih modela kada njihovim specifičnim zahtjevima. Za dodatne informacije o modelima i mogućnostima posetite našu veb-stranicu www.kolpasan.rs

Antislip premaz (samo za sanitarni akril)

Antislip coating (only for sanitary acrylic)

Antislip premaz (samo za sanitarni akril)

Antislip premaz (samo za sanitarni akril)

Prednosti ANTISLIP premaza

- nedrseća površina pri uporabi na tuš kadi oz kopalni kadi
- razvito za kopalniške oz wellness prostore ter hotelske kopalnice

Advantages of the ANTISLIP coating

- non-slip surface in shower trays and bathtubs
- developed for bathrooms, wellness and hotel bathrooms

Prednosti ANTISLIP premaza

- protuklizna površina kod upotrebe na kupaoničkoj odnosno tuš-kadi
- dizajniran za kupaonske odnosno wellness prostore i hotelske kupaonice

Prednosti ANTISLIP premaza

- neklizeća površina prilikom korišćenja na tuš kadi odn. kadi za kupanje
- razvijeno za kupatilske odn. wellness prostorije i hotelska kupatila

Veća varnost:

- pri vstupu in izstupu iz tuš kadi oz kopalne kadi
- med kopanjem in tuširanjem

Improved safety:

- when entering or exiting the shower or bath tub
- during showering and bathing

Veća sigurnost:

- pri ulasku i izlasku iz tuš-kade ili kupaonske kade,
- za vrijeme kupanja i tuširanja.

Veća bezbednost:

- prilikom ulaska i izlaska iz tuš kade odn. kade za kupanje
- tokom kupanja i tuširanja

Vodni masažni sistem (pnevmatski)

Water massage system (pneumatic)

Vodeni masažni sistem (pnevmatski)

Vodeni masažni sistem (pnevmatski)

Vodni masažni sistem deluje tako, da vodna črpalka ustvarja pritisk ter pretok vode skozi masažne šobe. Te usmerjajo curek vode, pomešan z zrakom. Na tisoče zračnih kroglic z veliko hitrostjo vode intenzivno masira človeško telo. Z uravnavanjem dotoka zraka v masažno šobo prilagajamo moč masažnega curka.

This hydro massage system is based on pressure created by water pump directing water flow through massage jets as mixture of water and air. As a result, your body is being intensively massaged by thousands of extremely rapidly moving air bubbles. A regulation system allows controlling air and water flow through the massage jets.

Vodeni masažni sistem deluje na taj način da pumpa za vodu stvara pritisak i protok vode kroz masažne mlaznice. Mlaznice usmerjavaju mlaz vode izmiješane sa zrakom. Tisuće zračnih mjehurića nošenih velikom brzinom vode intenzivno masira tijelo. Regulacijom dotoka zraka u masažu mlaznicu regulira se snaga masažnoga mlaza.

Vodeni sistem za masažu deluje tako što pumpa za vodu stvara povišeni pritisak i protok vode kroz mlaznice za masažu. Mlaznice usmerjavaju mlaz vode pomešan sa vazduhom. Hiljade vazdušnih mehurića, nošenih velikom brzinom vode, intenzivno masiraju telo.

Funkcije sistema:

- vodna črpalka
- vodne šobe
- pnevmatski vklop
- regulator pretoka zraka min-max
- odlivno-prelivna garnitura
- podnožje kopalne kadi
- obloga kopalne kadi
- 6 vodnih mikro-šob s preklopnikom in močnejšo vodno črpalko
- 2 dodatni vodni mikro-šobi

System functions:

- water pump
- water jets
- pneumatic switch
- air flow regulator min-max
- overflow set
- bathtub support frame
- bathtub panel
- high performance waterpump, 6 microjets with switch
- 2 additional water microjets

Funkcije sistema:

- crpka za vodu
- vodene mlaznice
- pnevmatski prekidač
- regulator protoka zraka min-max
- odvodno-prelivna garnitura
- podnožje kade za kupanje
- obloga kadi za kupanje
- 6 vodnih mikro-mlaznica s preklopnikom i jačom vodenom crpkom
- 2 dodatne vodene mikro-mlaznice

Funkcije sistema:

- pumpa za vodu
- vodene mlaznice
- pnevmatski prekidač
- regulator protoka vazduha min-max
- odvodno-prelivna garnitura
- postolje kade
- obloga kade za kupanje
- 6 vodnih mikro-mlaznica za vodu sa preklopnikom i jačom vodenom pumpom
- 2 dodatne vodene mikro-mlaznice

Vodni in zračni masažni sistem (elektronski)

Water and air massage system (electronic)

Vodeni i zračni masažni sistem (elektronički)

Vodeni i vazdušni masažni sistem (elektronski)

V ta sistem so vgrajeni vsi elementi vodnega in zračnega masažnega sistema. Medsebojno učinkovanje obeh sistemov intenzivno deluje na človeški organizem, ga popolnoma regenerira in sprosti. Zračni masažni sistem deluje tako, da zračna črpalka ustvarja pretok stisnjene zraka skozi zračne šobe. Te zrak razbijajo v drobne zračne kroglice, ki se mešajo z vodo. S svojo kinetično energijo masirajo človeško telo.

This system combines both water and air massage systems. Their interacting effect does great work for human organism with pure relaxation and a complete regeneration as a result. The air massage system is based on the air pressure generated by an air pump. The strong flow of compressed air running through the air nozzles results in millions of tiny air bubbles mixing with water and moving at high speed. It is their kinetic energy which provides massage to your body.

U taj su sistem ugrađeni svi elementi vodenog i zračnog masažnog sistema. Sinergija učinaka obaju sistema intenzivno djeluje na ljudski organizam, regenerira ga i opušta. Zračni masažni sistem djeluje na taj način da zračna pumpa stvara protok komprimiranog zraka kroz zračne mlaznice.

Mlaznice razbijaju zrak u sitne zračne mjehuriće, koji se miješaju s vodom te svojom kinetičkom energijom intenzivno masiraju tijelo.

U vodeni i vazdušni sistem ugrađeni su svi elementi vodenog i vazdušnog sistema za masažu. Istovremena aktivnost oba sistema intenzivno deluje na ljudski organizam, u potpunosti ga regeneriše i opušta. Vazdušni sistem za masažu deluje tako što pumpa za vazduh stvara povišeni pritisak i protok vazduha kroz mlaznice za masažu. Mlaznice razbijaju vazduh u sitne mehuriće koji se mešaju sa vodom, te svojom kinetičkom energijom intenzivno masiraju telo.

Funkcije sistema:

- zračna črpalka
- vodna črpalka
- super vodne šobe
- zračne šobe
- elektronski vklop za vodno in zračno črpalko
- regulator pretoka zraka min-max
- elektronska regulacija števila obratov zračne črpalke
- senzor za nivo vode
- odlivno-prelivna garnitura
- podnožje kopalne kadi
- obloga kopalne kadi
- 6 vodnih mikro-šob s preklopnikom in močnejšo vodno črpalko
- 2 dodatni vodni mikro-šobi

System functions:

- air pump
- water pump
- super water jets
- air jets
- electronic switch for water and air pumps
- air flow regulator min-max
- electronic regulation of the air pump rpm
- water level sensor
- overflow set
- bathtub support frame
- bathtub panel
- high performance water pump, 6 water microjets with switch
- 2 additional water microjets

Funkcije sistema:

- zračna pumpa
- vodena pumpa
- super vodene mlaznice
- zračne mlaznice
- elektronički prekidač za vodenu i zračnu crpku
- regulator protoka zraka min-max
- elektronička regulacija broja okretaja zračne pumpe
- senzor za nivo vode
- odlivno-prelivna garnitura
- postolje kade za kupanje
- obloga kadi za kupanje
- 6 vodenih mikro-mlaznica s preklopnikom i jačom vodenom pumpom
- 2 dodatne vodene mikro-mlaznice

Funkcije sistema:

- vazdušna pumpa
- vodena pumpa
- super vodene mlaznice
- vazdušne mlaznice
- elektronski prekidač vodene pumpe i vazdušne pumpe
- regulator protoka vazduha min-max
- elektronsko podešavanje broja obrtaja vazdušne pumpe
- senzor za nivo vode
- odvodno-prelivna garnitura
- postolje kade
- obloga kade
- 6 vodenih mikro-mlaznica sa preklopnikom i jačom vodenom pumpom
- 2 dodatne vodene mikro-mlaznice
